SUMMARY

Motivated fresher with a strong foundation in Python, Full Stack Development, SQL, and problem-solving. Passionate about learning new technologies and developing real-world applications. Seeking an entry-level software development opportunity to apply my technical skills, contribute to organizational goals, and grow as a software professional.

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, SQL
Frameworks/Libraries: NumPy, Pandas, OpenCV, TensorFlow, Node.js, Express.js
Web Technologies: HTML, CSS, React.js
Databases/Tools: MySQL, PostgreSQL, Supabase, Git, MS Excel

PROJECTS

Xceptional Vision – Cancer Tissue Classification **Deep Learning — CNN — Xception**

- Developed a deep learning-based medical image classification system to classify lung CT images into four categories using the Xception CNN architecture..
- Built an image preprocessing pipeline using OpenCV Bilateral Filtering, CLAHE, resizing, and normalization.
- Implemented transfer learning and data augmentation to improve model generalization and reduce overfitting.
- Trained and evaluated the model using TensorFlow/Keras, with Accuracy, Precision, Recall, F1-Score, and Confusion Matrix metrics.
- Developed a CT image prediction pipeline to classify new images and generate class probability/confidence results.

Cloud Kitchen / Online Food Ordering Website [Live] **JavaScript — Node.js — Supabase**

- Developed a full-stack food ordering website with customer menu, cart, checkout, catering, contact form, and admin dashboard.
- Built REST APIs using Node.js and Express.js for menu management, authentication, orders, and customer requests.
- Integrated Supabase PostgreSQL for permanent database storage and Supabase Storage for food image management.
- Implemented JWT authentication and bcrypt password hashing for secure admin and customer access.
- Deployed the frontend on Vercel and backend on Render, with GitHub for version control.

Student Grade/Result Management System **JavaScript — Node.js — REST API**

- Developed a full-stack web application for managing student records, subjects, marks, grades, and academic results.
- Built a Node.js backend with REST-style API endpoints for student, subject, result, and dashboard-statistics management.
- Implemented automatic grade and Pass/Fail calculation based on student marks. Designed a responsive frontend using HTML, CSS, and JavaScript with dynamic data loading through API calls

EDUCATION

Bachelor of Technology in Computer Science and Information Technology **2022 – 2026**
Koneru Lakshmaiah University, Guntur 8.18/10 CGPA

CERTIFICATIONS

Microsoft Azure Fundamentals
Microsoft Azure AI Fundamentals
Oracle Cloud Infrastructure Architect Associate
Salesforce AI Associate
